****Solarium:****

- Stylish chill-out area
- Private pool with unbeatable panoramic views
- Convenient guest toilet

This townhouse is the epitome of luxury living, offering not only comfort but also an unmatched location with views that will leave you in awe.

OUTDOORS & QUALITIES

These sprawling multi-level properties enjoy spectacular uninterrupted mountain and sea views from all rooms and provide the unique opportunity to customise each property to the discerning buyers' requirements. We understand that every buyer is different, so we created a totally individual offering at this development, delivering flexible and bespoke luxury properties at very attractive prices that cater to varying tastes and budgets. This unique approach to property tailoring is the first of its kind in Southern Spain and allows us to personalise our signature design and reform process to each individual property, professionally and cost-effectively managed for you at every step. Not offplan: The developer offers 3 levels of customisation for each

one of these types of properties. The transformation may go from a thorough remodelling and restyling of the existing home to a radical makeover that will include a reconfiguration of the existing floor space, an additional bedroom and a plunge pool on the rooftop terrace. As this is not an off-plan project, depending on which of the three levels of transformation and design you choose (Classic, Premium, Deluxe), you can be living in and enjoying your tailor-made home within a period of just 4 months from start to finish. Redevelopment is already underway and all licenses are in place including 1st Occupancy License, therefore any delays that are typically associated with a new development property are completely avoided here.

AREA

This project is located within 300km² of the breath-taking Sierra de Las Nieves Natural Park, in the heart of Andalucía's internationally recognised UNESCO Biosphere Reserve. In this strictly protected park, just 5% of the land is buildable, so the opportunity to live in such an idyllic location is very limited. This unique Natural Park promotes the conservation of biodiversity and sustainability including the conservation of landscapes, ecosystems and the protection of diverse vegetation and wildlife whilst also promoting ecological practices such as scientific research and education. A stunning location with a wide range of wildlife such as the Spanish Ibex mountain goat, roe deer, river otter, wild boar and various birds of prey surrounded by stunning pine and oak forests.
